## Professional Summary

I'm a Frontend Engineer passionate about building user-friendly, high-performance interfaces that look great and feel intuitive. With expertise in React, TypeScript, and modern frameworks, I thrive in collaborative environments where problem-solving and ownership drive success. I enjoy tackling complex challenges, optimizing for scalability, and continuously learning new tools to stay ahead. Committed to agile best practices and clean development principles, I create solutions that blend creativity with technical excellence. Let's connect and build exceptional digital experiences together!

## Employment History

### Frontend Developer, Solidify, Stockholm. - Ongoing

MAY 2025

@Scale adds digital tools to help estimate, plan and visualize work across multiple teams and projects in your organization. For organizations using the Scaled Agile Framework, SAFe, @Scale extends Azure DevOps so you can follow your practices in one platform.

- **Designed and implemented** new features to enhance product functionality and user experience.
- **Resolved reported bugs** efficiently, ensuring optimal performance and stability.
- **Contributed to solidifying** the codebase by following best practices and improving maintainability.
- **Participated in planning** sessions, aligning feature development with product goals
